World's Largest Propaganda Machine

By Cong. Ralph E. Church

Cong. Church

The New Deal has often been accused of operating one of the largest political propaganda machines ever established. It is a known fact, hardly open to dispute, that the enormous number of new offices created in the last six years have been filled by the New Deal faithful, not simply as an award for past political services but in preparation for the next election. The ill-advised "purge movement" brought to light how this extensive political machine, financed by the American people generally, can be made to operate even against Democratic Senators and Congressmen themselves when the New Deal Chiefs decide among themselves who should represent the party and the people. It caused a "rebellion" and Congress has decided to take some steps toward remedying the evil.

The so-called Hatch Bill is an example. In substance it is designed to restrain government employees from using their official authority to coerce and influence voters, and it is designed to put a stop to the vicious practice of exploiting the unfortunate on relief. In a sense this measure is the answer of Congress to the "purge." I seriously doubt that a measure of this character would have obtained the congressional support it has received were it not for the purge experience. Certainly as a strictly partisan measure it would not have a chance of enactment.

Bit by bit, in one way or another, in its rebellion against Executive control and bureaucratic usurpations, the Congress is gradually placing a check on the New Deal

"frankenstein" of departments, agencies and bureaus. The Hatch Bill is the most conspicuous example, but others are not to be overlooked.

In the Post Office Department Appropriation Bill of this session one will find a very significant provision. It was inserted in the bill as an amendment by Senator Joseph C. O'Mahoney, Democrat, of Wyoming. And, incidentally, Senator O'Mahoney won New Deal disfavor when he opposed the Supreme Court proposal.

This amendment provides that no executive department or agency of the Government can send out pamphlets, bulletins, books and such free of postage without having previously received a request for the publication. In other words, it is designed to put a stop to the wholesale sending out of literature under the frank by the various departments and agencies. The provision represents an effective check on the distribution of "propaganda."

The taxpayers will be interested to know how much this means to them in dollars and cents. They have been paying the postage. In 1928 the estimated revenue lost to the Government by the free materials sent out by the Executive departments was \$8,537,730. Ten years later, in 1938, that figure had grown to the sum of \$35,690,807. Since the New Deal has come into power the daily average of the number of pieces of literature mailed postage free by the departments is calculated at 2,103,700.

The official figures show that in the four years, from 1933 to 1937, the total cost to the taxpayers of departmental literature—the paper, printing and lost postage revenue—has been \$220,803,425. It has represented a daily loss of \$189,987.

It is a known fact, hardly open to dispute, that a very large percentage of the literature which has been mailed by the departments has not been, strictly speaking, of an official character but rather simply of a propaganda nature. It has been designed, not to present an accurate account of a particular department's work, but rather to paint a colorful picture of its great merits and accomplishments.

The Congress adopted the amendment of Senator O'Mahoney and thereby placed a check on the New Deal propaganda machine. And so, unwittingly, the "purge" has had some worthwhile results. It placed Congress in the mood to try to place a rein on the New Deal political-propaganda machine.

TREVOR

Mr. and Mrs. Arthur Baethke and children, Maywood, Mr. and Mrs. Walter Baethke, daughter, Vileta, and son, Raymond, Antioch, Mr. and Mrs. Arnold Buschman, Twin Lakes, Mr. and Mrs. Charles Knickrein, son and wife, Forest Park, spent Friday evening with the former's parents, Mr. and Mrs. A. J. Baethke, in honor of the golden wedding anniversary falling on that date. On Sunday Mr. and Mrs. Baethke held open house to their many friends and relatives. In the afternoon a mock wedding was performed by the sons and their wives, nieces and nephews, after which their life history was given by Louis Frillman, Melrose Park, the toastmaster. In the evening an immense wedding cake and lunch was served to the guests. Mr. and Mrs. Baethke received congratulations and well wishes from over 200 relatives and friends during the day and evening and also a number of beautiful floral pieces.

Mr. and Mrs. Edward Tress and daughters, Shirley and Ruth, of Hinsdale, Ill., visited their uncle and aunt, Mr. and Mrs. A. J. Baethke, on Thursday.

Mrs. Elmer Fleming, Mrs. Theron Hollister, Mrs. Charles Oetting, Mrs. David Eilers, Mrs. Rose Weinholz, Mrs. William Boersma and Mrs. Jessie Allen attended the Mother's Club card party at the Wilnot High school gym Tuesday evening.

Mr. and Mrs. M. Johnson of Arlington Heights visited Tuesday with Mrs. Johnson's parents, Mr. and Mrs. A. J. Baethke.

Mrs. Frank Lasco spent Wednesday and Wednesday night with her daughter, Mrs. Charles Oetting and her sister, Mrs. Joseph Smith.

Mrs. William Kruckman and daughter, Mrs. Ed. Eisenhart of Burlington, accompanied Mrs. Luannah Patrick and Milton to Farmers City on Thursday where they attended funeral services for their cousin, Mrs. Sarah Collier.

Mrs. Anna McKay and Ruth Thornton were Kenosha visitors Friday.

The Charles Oetting family and their nephew, George Oetting and family of Channel Lake enjoyed a picnic lunch at the Fox River park on Friday.

Hiram Patrick, Burlington, visited his sister, Sarah Patrick, on Thursday.

Mr. and Mrs. Earl Eilers spent Thursday evening in Kenosha.

Mr. and Mrs. Raymond Kierstead of Belvidere, Ill., and Mr. and Mrs. Winn Peterson, Wilnot, were callers at the Patrick home Sunday afternoon.

The Elmer Eilers family of Kenosha were visitors of Mr. Eilers' parents Sunday.

Miss Sarah Patrick, Mrs. Luannah Patrick and Milton Patrick were supper guests at the W. M. Kruckman home Sunday evening in honor of the birthday anniversary of the former's brother, Hiram Patrick.

Mat Hahn, Kenosha, was a Trevor caller Saturday.

Mr. and Mrs. Charles Thornton, North Fond du Lac, visited their aunt, Mrs. Anna McKay, and sister, Ruth Thornton, on Sunday.

Fritz Oetting, of Berwyn, spent the week-end with his uncle and aunt, Mr. and Mrs. Charles Oetting, and family.

William Baethke, Elmhurst, Mr. and Mrs. Edgar Baethke, Forest Park, Delores, Arthur, Jr., and Edgar Baethke of Maywood are spending this week with Mr. and Mrs. A. J. Baethke.

WILMOT

Guests of Mrs. Paul Ganzlin Saturday were Mrs. Oliver Matthews and granddaughter and Mrs. C. Heinzelman and granddaughter of Antioch.

The M. E. Ladies Aid is sponsoring an ice cream social on the spacious lawn of Miss Anna Kroucke's home beginning at 5:00 P. M. Wednesday and continuing on into the evening.

Coffee, sandwiches, ice cream and cake will be served. The public is invited.

Miss Dorothy Wells, Lake Villa, was a guest the last of the week of Mrs. R. L. Hegeman.

Frank Barch, Odessa, Fla., spent from Thursday to Sunday with Mr. and Mrs. Frank Kruckman.

Mr. and Mrs. Donald Herrick and son, Chicago, spent from Saturday to Monday at their Randall farm.

Mr. and Mrs. William Wertz spent Sunday in Kenosha with Mrs. Ray Schwartz who has been a recent patient at the Kenosha hospital.

Virgene Voss, Claudia and Eva Vincent returned Friday evening from an 8,000 mile tour of the western states. The group was gone four weeks and one of the high lights of the trip was the San Francisco fair.

Mr. and Mrs. H. McDougall entertained at a dinner Sunday honoring their daughter, Mrs. Russell Elwood's birthday anniversary. The McDougalls spent Tuesday in Milwaukee.

Wm. Lewis and daughter, Laura Lee, Milwaukee, spent the week-end with Mr. and Mrs. Frank Burroughs.

Sunday guests of George Faulkner were Mr. and Mrs. John Bryan, Chicago, Mr. and Mrs. R. J. Dolan, Kenosha.

Mrs. Herman Frank and Mrs. Earl Swenson entertained at a linen shower for Evelyn Zarnstorff at her home on Saturday afternoon. Six tables of luncheon were in play and a lunch served.

Leland Hegeman had a bad cut in his lower left eyelid on Friday when he accidentally bumped into a projection on a threshing outfit. He was taken to Dr. Dickey at Richmond, who took three stitches in the wound.

Mr. and Mrs. Henry Harm, Lake Geneva, Mr. and Mrs. Herman Frank and family, Mr. and Mrs. Oliver Balza and son, Kenosha; Mr. and Mrs. Frank McConnell, Jr., and son, Elgin, were guests Sunday of Mr. and Mrs. W. Harn.

Mrs. Balza and son remained for this week and Mr. and Mrs. McConnell after the week-end left for a vacation at the McConnell cottage at Twin Lakes.

Mr. and Mrs. Fred Gauger have moved into the Beck house vacated by Mr. and Mrs. H. Sarbacher and the Sarbachers moved into the flat over their garage and blacksmith shop. Mr. Sarbacher is now in personal charge of the shop.

Mrs. David Kimball and Mrs. Paul Ganzlin spent Thursday at Genoa.

Mr. and Mrs. Wayne Tilton and son, Robert, spent Sunday at Maple Park, Ill., with Mr. and Mrs. Clem Tilton. Donald and Charles Tilton returned to the home with them after a three weeks stay with the Wayne Tiltons. Robert Peterson of Rochelle is a guest of Mr. and Mrs. Tilton this week.

Mr. and Mrs. Howard Herrick and daughter, Chicago, visited Sunday with Mr. and Mrs. T. C. Loftus.

Six hundred dollars was the sum cleared at the Holy Name church dinner and bazaar on Sunday, July 16.

Rev. James Doyle, Chicago, read the ten o'clock mass and Rev. J. Jordan, of Adrian, Mich., the seven o'clock mass at Twin Lakes Sunday morning.

Peace Ev. Lutheran church, Wilnot, Wis., R. P. Otto, Pastor, Program for Sunday, July 30—English Worship 9:30 A. M. Program for Sunday, August 6: On this Sunday the Peace Congregation will celebrate its annual mission festival with three divine services. Pastor E. E. Guenther of Whitewater, Arizona, will preach at the morning service, which will be conducted in the English language. This service begins at 9:30 A. M.

In the afternoon the guest speaker will be Pastor Eugene Hinderer of Bristol. The time is 2:30. In the evening worship Pastor C. A. Otto of Wauwatosa will deliver the sermon. This service begins at 8:00 o'clock and will be conducted in the English language.

Narrow Strait
Bering strait, separating Alaska from Siberia, is less than 40 miles.

MILLBURN

There will be an ice cream social and bake sale at the church on Thursday evening, August 3.

Mr. and Mrs. George Anderson and Mrs. Annie Findlay of Lake Forest called on the Leslie Bonner, Horace Culver and Mrs. J. H. Bonner families.

Mr. and Mrs. J. Kaluf and Mrs. Frank Edwards spent Friday afternoon at the Dwight Ellis home at Bruce Lake.

Mr. and Mrs. Eric Anderson visited Mr. and Mrs. Wilsey Whitcomb of Rockford at their cottage at Fox Lake Friday evening.

A meeting of the Millburn Maidens' 4-H club was held at the school house on July 20. Plans were made for the Local Achievement Day which will be held on August 9, and for a beach party. Helen Prince gave a demonstration on "Testing Fabrics" and a piano solo was played by Lois Bonner. After the program the members worked on their projects.

O. A. Nelson and Miss Clara Nelson of Antioch called on Mrs. J. H. Bonner Thursday afternoon.

Arthur Johnson, Jr., is seriously ill at his home.

Mr. and Mrs. Fred Tebbins and son Wendell of Waukegan were callers at the home of Mrs. Ida Truax Sunday evening.

Mrs. Mattie Edwards and granddaughter, Patsy Dickie of Forest Park spent Sunday at the D. B. Webb home.

Mr. and Mrs. Ray Harmer and son, Robert, of Waukegan were callers at the J. Kaluf home Sunday afternoon.

Mrs. C. E. Denman and Mrs. Minnetta Bonner of Geneva were dinner guests at the J. S. Denman home Sunday.

Mr. and Mrs. Victor Strang and Geraldine and Lyman Bonner motored to Three Oaks, Mich., where they visited Mr. and Mrs. Earl Priest. Mrs. Leslie Bonner returned home after spending a week with her sister, Mrs. Priest. Mrs. Strang will remain a few days with Mrs. Priest.

Mr. and Mrs. A. J. Johansson, Sr., drove to Janesville, Wis., Tuesday.

Frank Jamison of Highland Park called on Mrs. J. H. Bonner Monday afternoon.

Ancient Lands

Sakhalin's history begins with the Stone age, relics of which and of the Bronze age are still extant, as seen in houses, bones and implements discovered. The island formerly belonged to the Chinese empire, but early in the Nineteenth century it was annexed by the Japanese, who ceded it to Russia in 1875. By the treaty of Portsmouth, N. H. (1905), following the Russo-Japanese war, the southern portion of the island was ceded to Japan by Russia, which retained the northern portion. The Japanese portion is now known as Karafuto.

Business Men Sell Boats

Providing sport for men, not children, is the toy boat regatta of the Peblinge Sea of Copenhagen, Denmark. Beautifully designed trim yachts in miniature, sail unpiloted across the water and the interest of these tired business men-owners is intense.

The Rise of the Nile

A rather pretty Egyptian legend tells that a drop from heaven, a tear of Isis, an ancient Egyptian goddess, falls into the Nile on a certain night of the year and causes it to rise. One of the great Nile annual festivals is the "Night of the Drop."

Barber Calls 'Next'

It May Be Marriage

EAST HAMPTON, CONN.—When Paul O'Connor, the barber, calls "next," he's never sure whether it's going to be a haircut, shave or a marriage. O'Connor is a justice of the peace and young couples visit his shop to be married. One couple insisted upon sitting in the barber chairs while they were "spliced."

SUICIDES OF WILD GEESSE IS PROBLEM

No One Seems to Know What To Do About It.

INDIANAPOLIS, IND.—Indiana conservationists agree that something ought to be done about wild geese killing themselves, but no one seems to know what to do.

Frequent suicides by the wildfowl have been reported in the state. At Washington a flock of geese landed in the streets one rainy night, got tangled up in trees and high tension wires and jaywalked into automobiles with disastrous results.

At Fort Wayne geese made an ill-advised landing at the airport, mistaking the wet concrete runways for lagoons.

Most recent was the case of four wild geese which crashed onto the ice of Lake Eva, near Worthington. The results were much more drastic than those attending "Little Eva's" escape on the ice, for they broke their necks.

This caused a huddle of the state conservation department, the Greene County Conservation club, Game Warden Estil Fulk, who reported the accident, and the U. S. biological survey which apparently left the conservationists considerably baffled.

They admit that the lakes they build to entice waterfowl into the state become dangerous hazards to the wild geese in freezing weather.

Laws making it illegal to kill wild geese out of season have been obtained by the conservationists. Now they must find a way to prevent the geese from killing themselves.

Smokestack Worker Is Happiest When Highest

AUBURN, IND.—Despite the fact that he has had a few close calls, Frank Kuhlman of Auburn would rather work on a 170-foot smokestack (or even higher if possible) than one on the ground.

Kuhlman has been building stacks from Connecticut to Florida and west to Alberta, Canada, for the past 34 years. He has worked on more than 500 in all.

But he has never forgotten the time when he was working on a 225-foot stack and was accidentally bumped by a tender (helper or top man). Over he went; but the tender caught him by the suspenders and pulled him back.

When working on stacks no one is permitted to make any sudden noises or exclamations, Kuhlman said. Every move is timed and one fast move—or false move—might mean death to someone.

The tallest stack on which Kuhlman has worked was the 350-foot stack at Rochester, N. Y. His next job will be on a 140-foot stack at Baltimore.

Ram Is Called Killer In Lawsuit for \$25,700

CANTON, OHIO—A farmer and his wife, Mr. and Mrs. Harry Mong, living on Indian Run road near here, were sued for \$25,700 in common pleas court because a ram belonging to them is alleged to have

strayed and butted an aged neighbor, causing her death.

George W. VanVoorhis, who filed the suit as the administrator of his mother's estate, says she received a broken hip when the sheep attacked her on the back porch of her home last December 12.

The suit further alleges that Mrs. Margaret VanVoorhis Loutzenhelsers' death on January 8 was caused by the compound fracture of her hip and other injuries received at that time.

Leg Broken 40th Time by Young Man of Toronto

TORONTO, ONT.—Harold Gibbons, 18, was in a hospital again today with his fortieth leg fracture. He has had his left leg broken 20 times; the right one 11 times.

The youth suffers from a rare disease, fragillia ossium, which causes extreme brittleness of the leg bones.

As Gibbons boarded a street-car late yesterday, he was thrown off balance. "I felt the bone snap," he said, "and knew I would be back in bed again."

Doctors estimate Gibbons has passed 4 years of his 18 in hospital beds with broken legs. The disease affects only the leg bones.

Fox Hound Gives Birth To 17 Puppies in Jail

TOMS RIVER, N. J.—Sheriff Sylvester B. Mathis, of Ocean county, revealed that his pedigree Delaware fox hound, Fanny, had established what he believed a record when she gave birth to 17 puppies in the county jail here. The mother and the puppies are all doing well, he said.

Stockholm Restaurant
In midair several stories above the street in Stockholm, Sweden, is the Ny Katerinahls, a restaurant that hangs "by its toes" beneath a sky bridge. Both the meal and the extraordinary view are worth the small charges on the menu.

Women Load Coal
Native women are employed to coal ships at Bridgetown, Barbados, in the British West Indies. The happy, carefree dusky maidens balance heavy loads of coal upon their heads as they swarm over the wharves.

McKinley's Ancestral Home
President McKinley's ancestral home is now on the tourist map of Europe and is found at Conagher, near Derroek in Ireland's Antrim. It is but a cottage of one living room.

Samland in Germany
Samland, not Uncle Sam, land, is in Germany, and welcomes large numbers of Americans every year to the famous "Amber Coast" of the Baltic and the dune lands nearby.

Horse Food
During a year's time an average horse requires 50 to 75 bushels of grain, principally corn, two tons of hay and two acres of permanent pasture.

Rome Opera Has Nursery
To enable people with babies and no servants to attend the opera, a nursery has been opened in the opera house in Rome, Italy.

Another Fish Story
A fisherman near Manteo, N. C., netted a 270-pound, eight-foot-long cow sturgeon, one of the largest fish ever caught in that region.

Fly Aid to Plants
Not all flies are pests. The drone fly does much good in devouring plant lice.

Crown Jewels of Golf
The so-called crown jewels of the game of golf are on exhibition at the clubhouse at St. Andrew's, Scotland. The regalia includes trophies nearly 200 years old, as well as the earliest drivers and golf balls.

It's a Clinch
Boys at Emporia (Kan.) State Teachers college never have trouble finding dates. There are 950 girl students and only 680 boys.

Group Singing
Group singing is a regular part of the study and recreation program carried on by home demonstration agents in Louisiana.

Murphy Boasts Marble
The only marble courthouse in continental America is at Murphy, S. C. It is built of native marble.

Stream for Women
A trout stream for women anglers only has been set aside in western North Carolina.

Boarding Kennels and Veterinary Service
Modern, new, sanitary boarding kennels. Individual yards, veterinary service for pets. 1 mile east of Antioch High School on Route 173. Dr. W. P. Tague Phone Ant. 231 (49-52)

"I took Geo. Boughter 120,687 miles and then he got me a new engine. Just ask him about V-8 motors... for performance, economy, and endurance!"

"I took Jack Elliott 20,000 miles on 20 changes of oil with never a drop in between. He says he never had a car that made a dollar go so far!"

"I gave Tom Ricks 17 to 18 miles a gallon for 80,000 miles, and up to 60,000 miles I never cost him a drop of oil between changes!"

Tip
TO NEW CAR BUYERS
from a used car lot!

Over the country, thousands of Ford V-8's have matched the 3 real-life stories quoted above. Remember what they say, as you choose your new car. There's more to a Ford V-8 than the many exclusive fine-car features it gives you at its low price. There's also a matchless record behind every Ford V-8. More than 27,000,000 cars ago, the Ford business was started to give low-cost transportation at its best, and in the 1939 Ford V-8, it's doing just that today!

For low-cost transportation at its best—now as always!

SOCIETY NOTES

ROYAL NEIGHBORS VISIT GURNEE CAMP

Mrs. Arthur Edgar, Agnes Hills, Sine Laursen, William Teckert, Hugh Hufendick, Effie Nelson, Raymond Burnette, Carl Anderson, Charles Wertz, Lena Grube and Alma Harden represented the Antioch Royal Neighbors camp at a "Friends' Night" meeting held by the Gurnee camp Tuesday evening.

Mrs. Laursen, chancellor of the Antioch organization, and Mrs. Harden, who is inner sentinel, filled offices on this occasion.

Other camps represented included those of Prairie View, Russell, Highland Park, Lake Villa and Lake Forest.

The Antioch camp's next meeting will be held on Tuesday, August 22. Meetings which ordinarily would have been held on Tuesday evening of this week and on the evening of August 8 were suspended for a brief "vacation" in organization activities.

SHOWERS COMPLIMENT MISS BETTY BRAY

A much-feted bride-to-be is Miss Betty Bray, daughter of Mr. and Mrs. E. D. Bray, Lake Villa, whose marriage to Kenneth McNameara of Grayslake will take place on August 5.

The Misses Bertha, Ruth and Cora Crémien of Lake Villa were hostesses at a shower at their home last week in her honor.

Miss Salina Hook, Gurnee, and Miss Myrtle Kruzer, Half Day, gave a party for Miss Bray recently at the Hook home and another of the events honoring her was a shower which Mrs. C. S. Green of 6442 Leavitt avenue, Chicago, and Mrs. LaVerne Spengler, Waukegan, gave at the Spengler home.

SOCIAL TO FOLLOW LADIES' AID MEETING

A combined business and social meeting will be held by the Ladies' Aid Society of the Antioch Methodist church Wednesday afternoon, August 2, in the home of Mrs. J. D. Dunning, the Hancock house on North Main street.

A bakery sale and a package sale will be among the features.

Mrs. John Murray is to be the assisting hostess.

4-H CLUB HEARS TALKS AT MEETING

Talks on "The Care of the Hair," by Doris Burdick; "Cutting Bias," by Theodora Hennings; "The Care of Clothing," by Louise Schuchman; "Athlete's Feet," by Mabel Lou Hunter, and "Neck Finishing," also by Mabel Lou, were given.

Alice Harvey read a poem and an accordion solo was given by Theodora Hennings.

Twenty-seven tables of cards were arranged at a party sponsored by the Antioch Eastern Star chapter last Monday afternoon at the high school. Misses Elmer Hunter, William Anderson, John Gaa and C. L. Knit were the hostess committee.

Mrs. Eric Biggs, her daughter, Marian, and son, Eric, have just arrived from England for a visit with her sister and brother, Mr. and Mrs. W. A. Sommermeier, of Bordon Oaks, Lake Villa.

Mr. and Mrs. Boris Ridell of Villa Woods have gone for a three-weeks vacation through Colorado and points west.

All four children of Mr. and Mrs. Roman Vos, 789 North Main street—Bill, eight and a half years old; Ronald, seven; Mary Christine, five, and Philip, three and one-half—are rejoicing that their two weeks' siege of chicken-pox is drawing to an end and that the "quarantine" sign on the front porch of their home is coming down on Saturday.

Mrs. Effie Nelson entertained the members of her two-table bridge club at her home, 1003 Victoria street this afternoon.

Juanita and Paul Roberts, North Chicago, are spending a week with Bernard and Joyce Mueller.

Miss Betty Lu Williams gave a farewell dinner last Wednesday for Miss Elizabeth Huff of Urbana, Ill., who is leaving next month to spend three years in China, Japan and France. Miss Huff, who is a student of ancient Chinese art, is being sent on this trip by the Rockefeller foundation.

Miss Evelyn Van Patten left Sunday evening for Chicago after spending a two weeks' vacation at the home of her parents, Mr. and Mrs. J. H. Van Patten.

Mr. and Mrs. Joseph Dupre and daughter, Wichita Falls, Tex., have left for their home after a week's visit with friends here.

Act Now—Awnings, window shades, linoleum, Venetian blinds, wallpaper, paints drastically reduced during July. Pitts Paint Store 2232 Roosevelt Road, Kenosha. Phone 4632. (11)

Miss Frances Geraldine Turk, Center street, Waukegan, left for her home last Monday after spending 11 days visiting her aunt, Mrs. Anna E. Kelly, of North Main street.

CHURCHES

CHRISTIAN SCIENCE SOCIETY

Antioch, Illinois
Sunday School—9:30 A. M.
Sunday Morning Service—11 A. M.
Wednesday Eve. g. Service—8 P. M.
A reading room is maintained at the above address and is open Wednesday from 2 to 4 and 7 to 8 p. m., and Saturday, 2 to 4 p. m.

CHRISTIAN SCIENCE CHURCHES

"Truth" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, July 23.

The Golden Text was, "Holy Father, keep through thine own name those whom thou hast given me, that they may be one, as we are... Sanctify them through thy truth; thy word is truth" (John 17:11, 17).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "O send out thy light and thy truth: let them lead me; let them bring me unto thy holy hill, and to thy tabernacles" (Psalms 43:3).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Christian Science brings to light Truth and its supremacy, universal harmony, the oneness of God, good, and the nothingness of evil" (p. 293).

METHODIST CHURCH NOTES

Warren C. Henslee, Pastor
Church School—9:45 A. M.
Worship Service—11:00 A. M.

Schedule of masses at the Holy Name church starting Sunday, June 18: 6:00 and 8:00—Rev. J. Vorman; 10 and 11—Rev. A. Schneider. At Twin Lakes—7 and 9, Rev. J. Finan. All masses on standard time.

Lake Villa Community Church

I. B. Allen, Pastor
Sunday School—10 A. M.
Worship Service—11 A. M.

The Sunday school picnic is being planned for some time in July, at which time all children and mothers will be invited to attend. The picnic will be held in the public Lehmann park—date to be announced later.

Lake Villa Community Church

I. B. Allen, Pastor
Sunday School—10:00 A. M.
Worship Service—11:00 A. M.

In the absence of Rev. Allen who is enjoying a vacation with relatives in Iowa, Rev. Pierstoff of Millburn will preach at 11 a. m. next Sunday morning.

St. Ignatius' Episcopal Church

The Rev. J. E. Charles
8th Sunday after Trinity, July 30th
7:30 A. M. Holy Communion.
11:00 A. M. Church School.

We cordially invite you to worship with us.

R. R. Unemployment Aid

Railroad workers who are unemployed and who earned \$150 or more in 1938 in railroad work may now get benefits under the Railroad Unemployment Insurance Act which went into active operation July 1, the Railroad Retirement Board pointed out today. Such unemployed workers should register and file a claim for the benefits at the last railroad for which they worked, or, if located at some distance away from their last job, at the nearest office of a railroad.

Funeral Processions

Have the Right-of-way
Funeral processions have the right-of-way over all other vehicular traffic except emergency cars, Charles M. Hayes, president of the Chicago Motor club, pointed out today.

The only cars which can legally break through a procession in which the cars carrying mourners, marked by flags or windshield stickers, are ambulances, fire engines, or police cars, he said.

Diamond Melting

It takes heat of 73,500 degrees centigrade to melt a diamond.

Personals

Mrs. Ruby Richey left last week for Illinois State Normal at Charleston, where she is finishing out the term of a home economics teacher and dietitian who has accepted a position in New York.

Miss Saxon Macknick, North Chicago, was a guest of Miss Ruth Williams recently.

Mr. and Mrs. Carl D. Hughes and Miss Dorothy Hughes of Kewanee, spent the week-end with Mr. and Mrs. Robert Hughes at Davenport, Ia.

Miss Jessie Brosseau, Waukegan, was a visitor here Thursday morning.

Mr. and Mrs. N. E. Shibley and Mr. and Mrs. H. B. Gaston spent the week-end with Miss Mary Tiffany at her cottage on the Keewenaw peninsula near Copper Harbor in northern Michigan. Mr. and Mrs. Gaston celebrated their thirtieth wedding anniversary quietly last Tuesday. They received a number of messages from out-of-town friends.

Mrs. C. J. Heinzelman and granddaughter and Mrs. Oliver Mathews were guests of Mrs. Paul Ganzlin, Wilmet, Saturday.

Mrs. Howard Gaston and daughters, Joline and Judith, returned home Saturday after spending last week with Mr. and Mrs. H. E. Shepard in Woodstock.

Mrs. J. H. Van Patten and children, Arden and Evelyn, visited relatives in North Lake, Wis., Saturday. On Sunday they visited relatives at Beloit, Wis.

Sister Mary Teresa Norena, B. V. M., of California, and Sister Mary Nazareth of Chicago were guests of Sister Norena's parents, Mr. and Mrs. James Solon, at the home of Mr. and Mrs. John Doyle, Channel Lake, Monday.

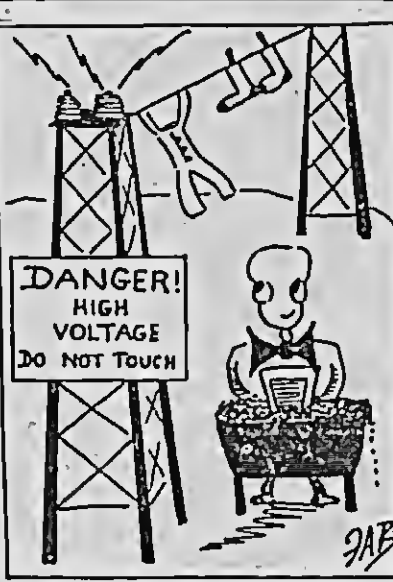

Miss Deedie Tiffany and Mrs. Chase Webb left this morning to spend several days with Miss Mary Tiffany at her cottage near Copper Harbor, northern Michigan.

Mr. and Mrs. G. A. Bosomberg, Riverside, Ill., were guests for a few days recently at the R. D. Williams home.

Mrs. W. H. Belcher and daughter, Marjorie; Miss Rita McCarthy, Miss Susan Kernan and John Herbie, all of Chicago, are guests of Mr. and Mrs. John Doyle at their home, Ken-Doyle, at Channel Lake, this week.

Terry Pin's Tips on WASHING

By
FREDERIC A. BURNINGHAM

WOMEN face a great problem with washing. It is getting so that it's only with great difficulty can they find a driver of a laundry truck who is polite and good-looking.

Shirts and socks come back from the laundry spic and span. This is perfectly OK if the spic and span are your particular size.

Men suffer more from starch in their collars than in their diet.

Laundries illustrate the law of supply and demand. You supply them with shirts with plenty of buttons on them, and then keep on demanding that they stop breaking the buttons.

A Kingdom Without a King

Hungary is a kingdom without a monarch, says the National Geographic society. After the World war, this country first became a republic, via the revolutionary process; then, in 1919, a Soviet state under the "dictatorship of the proletariat." The following year the opposition came into power, annulling the previous regimes and returning the nation to its former status of a monarchy. A kingdom with an empty throne, Hungary has been ruled since by a regent who has been absolved from responsibility to parliament.

Disappointing Ending
Fred Rebell, single-handed sailed a sloop from Australia to Los Angeles, a distance of 8,000 miles, and then was shipwrecked by a gale in Los Angeles harbor.

Population Increase
The average annual increase in the population of the United States between 1920 and 1935 was over 1 per cent.

It's an Idea

Says Thrifty Mary

Even though the heat and general lassitude of summer time make the task somewhat unappealing, it's a good idea right at this time of year to look over the family's stock of winter and fall clothing, and send articles that need cleaning to the cleaner's.

It seems as though moths get in some of their "worst ticks" right around this time of year, and a dollar or two spent on cleaning bills now may save several dollars in clothing replacement later.

Summer is a pretty good time, too, to get some of that indoor painting and varnishing done. You can turn the family out-of-doors and press sleeping porches and lawns into service while the paint is drying.

A family we know makes a practice of having supper out of doors on the lawn during the summer. The youngsters love the idea, and their mother finds it saves a bit on cleaning up crumbs afterward—besides being cooler.

When baking pie crust, don't forget to salt it to taste. Many a salt-less crust has given a "flat" effect to the flavor of an otherwise perfect pie.

A recipe for French dressing that was brought over from France by a girl we know has this simple formula—one part of good quality olive oil to two of vinegar, add sugar and salt to taste, and enough paprika to impart a pinkish or reddish tinge. Stir well. Proportions of ingredients can be varied somewhat to suit differences in tastes. This dressing goes especially well with head lettuce, shredded cabbage, or combination vegetable salads, and may also be used in fruit salads.

The quicker the boil, the better the jelly! New-fashioned jelly recipes require exactly one-half minute of boiling time.

About a hundred years ago, jelly making was so long and tedious that the kitchen stove couldn't be spared for the process. Charcoal furnaces, set in the open air, were found "most convenient" for the task.

"The jam, if nicely done, has more fruit flavor than the jelly," quoth an heirloom cook book many years before the modern, short-boil recipes.

Stone milk cracks. If you use jars were used for stewing down the jelly, and thick white paper, soaked in brandy, was considered the very best cover for the home-made spreads.

The world's first regular cook book was published in France in 1692, but as far as we know it contained never a recipe for a quivering spread.

Great-grandmother used to color her mint jelly an oh-so-delicate green with spinach leaves from which the juice had been "expressed."

"Pooka," according to an old Irish superstition, is the fairy that makes the juice of herring jelly. We modern homemakers call it pectin... but it still puts the jelly in jelly.

To be a good cook, says Ruskin, means the economy of your grandmother plus the science of the modern chemist. Which is just another definition for the new-fashioned jelly directions, now isn't it?

One of those jellies with a fragrance as delightful as its flavor is the good old mint.

Gooseberries have never yet attained the popularity they deserve—but that's probably because most of us haven't tried a short-boil gooseberry and currant jam. Ummm!

Wild or tame, blueberries spiced with cinnamon make one of the most unusual and tasty jams... with a mere 2-minute boil, at that.

Ripe plum marmalade is a dainty dish to set before a King... or any other man, for that matter.

Chris Columbus discovered the pineapple in the West Indies... we've discovered the flavor harmony of fresh pineapple and strawberries combined in a short-boil jam.

Send household hints and recipes to Mary, care of Antioch News, Antioch, Illinois.

Card of Thanks

We appreciate very much the cooperation given by the people of the community for the success of the Annual Summer festival held by the Legion during the week-end.

The committee regrets that the usual "rides" which had been contracted for did not show up. Further action that may be taken in this latter connection will be discussed at a meeting of the post.

Antioch Legion Post No. 748.

Births

Mr. and Mrs. Oren Hostetter are the parents of a daughter born July 17 at Little Company of Mary hospital in Evergreen Park. Mrs. Hostetter is the former Irma Hanke of Antioch. The couple have been residents of Oak Park for the past two years.

Good Friday's Child
In early Christian times, the name Christopher was given every male child born on Good Friday. It means "Christ bearer."

Peppermint Is Product Of Pacific Northwest

Most of us like the flavor of peppermint in candies, gum, toothpaste, soft drinks, ice cream and other delicacies. This pleasant, aromatic oil also helps to make some of our medicines more palatable, and has a wide variety of other commercial uses.

Peppermint, known botanically as mentha piperita, has been grown in the Pacific Northwest for about 25 years, says the Washington Farmer. There are now about 3,500 acres of mint under cultivation in this area. Good mint produces 40 to 80 pounds of oil per acre and in 1938 it sold for about \$1.75 a pound.

Wild mint is found in many moist spots and lowland areas, but it is of no commercial value, as the oil yield is small and of low quality.

Mint requires low, well-watered muck lands, or irrigated soils. Harvest generally comes in August. Mint land should be summer-fallowed. The plants are started from selected runners, which may be plowed out from an oil field and transplanted, end to end in rows about 3 1/2 feet apart. The cost of runners to set a crop is around \$15 an acre. Young plants can also be set one foot apart in May or early June. Constant cultivation is required. After the mint is up about six inches it must be weeded several times by hand, as weeds and grass in the hay will discolor and taint the oil.

Bad Luck Expectancy

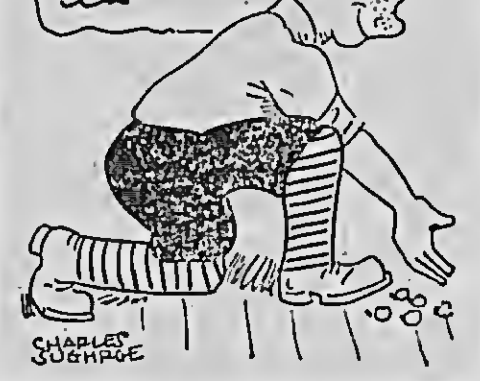

A major emergency in the form of a serious illness, surgical operation, or accident, must be faced every 11 years by the average American family. If it is illness, it will most likely be pneumonia or stomach ulcers with an average cost of \$343 for doctor, nursing, and hospital expenses. If it is an operation, it will probably be an appendectomy at a cost of around \$250; if an accident, chances are it will be either an automobile crash or a fall of some kind costing \$240 to remedy.

Jonah and the Sea

Davy Jones is said to be a corruption of Jonah, the name given by sailors to the evil spirit supposed to rule over the sea demons. Thus, to go to Davy Jones' Locker means to be drowned or to be buried at sea.

BILL GERBER, Prop.

'round the Resorts

Home chapter of the Chicago Eastern Star, composed of junior girls, is planning to hold an outing at Kempf's resort, in Beachwood subdivision at Petite Lake, August 13.

Mrs. Charles Kempf is a member of Sunshine Chapter 683, and Mr. Kempf belongs to Theodore Roosevelt lodge. Seventy-five were present at the annual picnic which the Zither club of Chicago held a week ago Sunday. Chicken and duck dinners were served to the gathering.

State highway policemen were stopping cars at Looon lake Monday to check on whether or not the drivers had their operator's licenses. So, if you haven't gotten yours yet—

Her first visit to Antioch in three and a half years is being enjoyed by Mrs. Ethel Nelson of Los Angeles, Calif., who is staying with her sister, Mrs. Charles Anderson, at Anderson's resort on Petite lake. Mrs. Nelson will be here until the end of August. Burnett's orchestra is still "going over big" at Anderson's where it furnishes both modern and old time dance music.

Mr. and Mrs. Andrew Ireland served 247 dinners at their Lone Oak Inn on Petite lake Sunday, according to a tally kept by Mrs. Ireland. Practically all of the resorts had a busy week-end—the busiest since the Fourth of July, some of the proprietors said, and many of them were almost forced to turn patrons away when they started to run out of food.

The delicious Tom Collins served at Steltz place are winning a lot of favor during this hot weather. They're being featured there this week. And the country fried chicken is making a decided hit with the customers.

Mr. and Mrs. A. W. Shunnesson of Shunnesson's resort on Grass lake were among those who took advantage of the Monday lull after Sunday's rush of business to spend a day in Chicago.

Mr. and Mrs. E. H. Holzrichter are inviting all of their friends to attend the first anniversary celebration of the Old Orchard Inn on the evening of Saturday, July 29. Good music and a free plate lunch will be among the features, they announce.

The Inn is located on Route 54, one mile south of Antioch.

The Holzrichters have a 16-room winter home on the Dixie highway opposite Indian river at Cocoa, Fla., which they are thinking of turning into a tourists' hotel next winter. In case they carry out this plan, Mr. Holzrichter may call the Florida place "The Antioch House," he says.

KNOW THYSELF
by John Harvey Furbay, Ph.D.

IS IT NATURAL FOR A PERSON TO WISH HE WERE SOMEONE ELSE?

WHILE a few people go through life wishing they were someone else, many of the rest of us go through trying to make people believe we are someone else. We don't like to have our age known, for we want to be taken for younger. We like for people to believe we have more education than we do; that we have traveled far; that we have made lots of money; that we come from unusual blood, and a thousand other deceptions. A tactless person tries to make you feel that he knows the truth about you, while a tactful one never intimates that he sees through you. Yes, this is all natural and a part of our instinct to achieve standing among our fellows. It is the lowest form of recognition and should be replaced, wherever possible, with true values we have actually won for ourselves.

(Released by Western Newspaper Union.)

Veteran Wagon Still Used

A wagon, now owned by E. F. Russell of Sweet Home, Ore., is reported to have been in continuous use from 1852, when as a covered wagon it came across the plains to Oregon. In 1925 it was reluctantly released from service. A few parts had been renewed, but the wagon remained much as it had been the day Oliver H. Russell arrived in Oregon where he settled in the Sweet Home district.

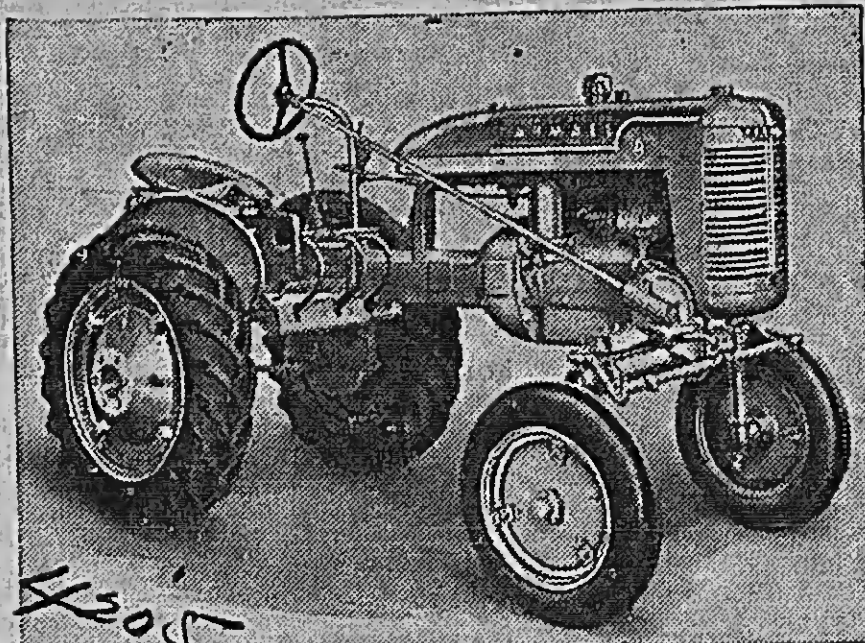

Louisiana's Sugar Cane

Louisiana produces 95 per cent of the sugar cane grown in the continental United States and imports for refining many millions of tons of raw sugar.

Rugs From Toothbrushes

Louisiana State university field workers instruct farm housewives how to make rugs with string and a needle fashioned from the handle of a discarded toothbrush.

New Farmall-A to be on View Short Time Only

Growers of corn or other row crops will want to be on hand next Tuesday afternoon, July 28, to witness a brief preview of the new Farmall-A tractor at the salesroom of Charles F. Richards in Antioch.

This latest addition to the Farmall line is regularly equipped with rubber tires and is sold at a new low price to interest every farmer. It promises to bring power farming to men who cultivate from 40 to 60 acres of land and who have heretofore relied exclusively on horses.

"Culti-Vision" is the feature possessed by this tractor that will appeal to the careful operator. The design of the tractor enables the driver, to see the work he is doing, not only

ahead and behind the tractor but directly underneath as well. Thus a row-crop farmer can cultivate, cleaner, with less damage to the crop because he has the same "vision" afforded by the ordinary horse-drawn riding cultivator.

Factory production has been started by the International Harvester Company and samples soon will be on display everywhere. In the meantime, a preview has been arranged by Mr. Richards of Antioch in order to show interested growers something new in the way of a row-crop tractor for small and medium operations. We are told the new Farmall-A will be here next Tuesday afternoon for a few hours only.

Yesterdays

48 YEARS AGO
In the Antioch News Files
July 30, 1891

One of the many curiosities to be seen at the coming world's fair will be the one and one-half story log cabin, once the home of those noted desperadoes, the James boys.

The Fox Lake foreign correspondent, while journeying recently on the wheel with which the NEWS supplies its staff of reporters, found himself weather-bound at the head office in Antioch and was therefore assigned to the duty of saving wood at home, as his pay keeps running just the same, rain or shine. He was assigned to interview prominent business men of the town, and was greatly impressed by the sight of new buildings rising alongside the charred ruins of those destroyed by the big fire some time ago.

Sam M. Stewart of Trevor is about to move to northwestern Iowa in a few days. He is buying quite a large flock of sheep to take out there. He is taking the advice of Horace Greeley who said, "Young Man, go west," having bought 160 acres of land on which he intends to make for himself and wife a home. Success attend his enterprise.

The following letter with remittance for a five-line advertisement in the NEWS of July 2, in which the writer advertised for a coat that had been lost somewhere between Antioch and the lake resorts, explains itself and gives a good pointer to our business men and others:

"Office Chicago Herald, July 23, '91

"Dear Mr. Burke:

"Enclosed please find 25c for ad. in NEWS of July 2. We got the coat within a week after the publication of the ad. It pays to advertise in the NEWS."

"Truly, Harry G. Forker."

30 YEARS AGO

July 29, 1909

An auto belonging to Mr. Druce of Grayslake was entirely burned one day last week. All Grayslake is looking for the culprit, and if found things are likely to go hard with him.

On account of the intense heat carpenters and other workmen were obliged to suspend work Thursday.

Rev. Thos. Quayle, secretary of the Lake County Law and Order league, was seen on our streets Tuesday.

American Beauty corsets and girdles, priced from 50c to \$1.35, on sale at Gauger Bros. & Co., Antioch.

15 YEARS AGO

July 31, 1924

Three trucks, six men engaged in beer running, and 60 barrels of alleged beer were nabbed by the sheriff's squad Wednesday night.

The lotus beds this year will not be up to expectation. There have been reports around that the water had covered them up, but an old timer advances the theory that the lotus is a "seven year plant." Like rice and other varieties they multiply so in seven years they choke themselves off.

The lotus last year reached its height last year and naturally this year there will not be so many.

A. H. Myers, village clerk of Fox Lake, was in Waukegan last week to purchase a stock of padlocks. A large number of tourists have been arrested for violation of the motor vehicle laws at Fox Lake, but when they were jailed at night they usually had disappeared by morning. So Clerk Myers now has a supply of padlocks to make the jail "bird-proof" in an effort to increase the total amount of fines.

Tennessee School Tax
Tennessee's first school tax was levied in 1934.

LAKE VILLA

The Aid Society enjoyed a splendid meeting with Mrs. Whitaker at her home last Wednesday and the group will meet at Fox River park near Wilmette on the Fox River for their next meeting on Wednesday, Aug. 2. Cars will leave Lake Villa at 11 A. M. and the meeting will be held at 2 p. m. Visitors are welcome. Please bring your own sandwiches or the makings and a dish to pass, besides your own dishes and silver.

Mrs. Stella Pedersen and her guest, E. Pedersen, of Richmond, Va., enjoyed a visit with relatives near Janesville, Wis., last Friday and on Tuesday spent the day at Naperville, Ill.

The Visco Club of O. E. S. at Millburn will sponsor a demonstration of electric cooking at Millburn on Thursday, Aug. 3, and will serve a dessert luncheon at 1 P. M., and play cards before and following the demonstration at 2 p. m. The public is invited.

Mrs. Mary Nickerson and son, Gene, are spending two weeks with relatives in southern Michigan.

Several Royal Neighbors attended Friends' Night at Gurnee Tuesday evening and Mrs. Paul Avery, Mrs. Oscar Douglas and Mrs. Bertha Fish took part.

Mrs. J. O. Hucker and J. O. Hucker, Jr., visited the Mitchell family in Chicago Sunday and Monday.

Arthur Thayer visited his mother, Mrs. Louisa Thayer, one day last week.

Mrs. Wm. Solberg and children are spending the week with her sister in Waukegan, and the family will move to Fox Lake soon to be near the airport where Mr. Solberg is employed.

The Lake Villa Fire department will hold their annual carnival next Friday, Saturday and Sunday, and will have many attractions to entertain the public.

John Meyer, who has the contract for the school house gymnasium, has the work well under way.

Miss Anna Lindsay, a former Chicago school teacher, has opened her cottage on Oak Knoll Drive.

Mr. and Mrs. Edgar Kerr, Miss Jeanne and Master Jack of Bloomington, Ill., were guests of their parents, Mr. and Mrs. James Kerr, last Saturday and Sunday.

Mr. and Mrs. Charles Kelly have guests from Oklahoma.

The Fox Lake Cemetery Society will hold its quarterly meeting at the Monaville school-house Thursday evening, August 3, and members will please take notice. Eva Atwell, Sec.

HICKORY

Mrs. Curtis Wells and Miss Lillian Wells returned home on Wednesday July 19, from a three weeks trip. They visited relatives in Washington, D. C., and also the World's fair in New York.

Mrs. S. W. Ames, Richard Clark and Norman De Looi of Gurnee and Miss Caryl Tillotson enjoyed a motor trip on Friday and Saturday of last week. They visited the Palisades State Park near Savanna, Ill., crossed the Mississippi into Iowa and drove north up to southern Wisconsin.

Miss Helen Thompson visited from Tuesday afternoon until Thursday night at the Dr. P. P. M. Jorgensen home in Kenosha.

Mr. and Mrs. Ralph Fields and Miss Hazel, spent Thursday in Chicago at the hospital.

Mr. and Mrs. Howard Wells of Racine visited the Schedek and Wells homes Saturday afternoon, after a week's vacation in northern Wisconsin.

Miss Margaret Cook of Waukegan visited the C. Cook home on Sunday.

Mrs. Mattie Edwards and granddaughter, Patricia Dickey, of River Forest, and Mrs. D. B. Webb and Webb Edwards of Millburn called on Mrs. Pickles Sunday afternoon.

Mr. and Mrs. John Nelson from Minneapolis, Minn., are spending a few weeks at the home of their son, Marvin Nelson.

Mr. and Mrs. George Olsen of Cedar Lake visited the Max Irving family Sunday afternoon.

Leo Thompson of Richmond called at the W. D. Thompson's Sunday morning.

Mr. and Mrs. R. C. Bishop, and daughter, Eloise, Miss Grace Tillotson of Kenosha, and Mrs. E. W. King left Thursday morning on a motor trip to visit relatives in Oklahoma.

Mr. and Mrs. Kenneth Pullen and daughter of Kenosha visited the Schedek family Sunday.

Mr. and Mrs. H. A. Tillotson and Miss Caryl, and Mr. and Mrs. W. D. Thompson and Miss Helen, visited their cousins, Dr. and Mrs. A. J. Stokes and sons, at their summer home at the "Birches," at Lake Geneva, Sunday afternoon and enjoyed a trip around the Lake in the Doctor's motor boat.

The Misses Caryl Tillotson and Helen Thompson visited the LaCross family in Chicago Tuesday and Wednesday of this week.

Bridges Over the Tiber

Completion of the new Duca d'Aosta bridge across the Tiber will help materially to relieve traffic congestion at Rome. Fourth of a series of new bridges built to facilitate motor and pedestrian traffic across the Tiber, the Duca d'Aosta bridge takes the place of the historic old Ponte Milvio, the ancient stone bridge which has borne traffic across the Tiber since the early Roman era.

High Cost of Automobiles

Past year's tax bill took away two weeks' income from 10,000,000 car-owning families and nearly one week's from an equal number, according to Baird H. Markham, director, American Petroleum Industries committee.—Business Week.

Oregon's Capitol Trees

The more than 200 trees that ornament Oregon's state capitol grounds are said to represent fully 30 families of the botanical world, including rare varieties from every section of the globe.

Modern Oil Hunt

The search for oil is carried on with modern methods through the use of an earthquake echo camera (geophysical recording oscilloscope) which records sound vibrations from an underground explosion.—Electronics.

Early Milkmea

House-to-house delivery of milk dates from the Middle Ages. And in those early days the product was absolutely fresh when received by the consumer. The cows were driven from house to house and milked on the spot.—Food Industries.

TO ENTERTAIN AT LIONS' FESTIVAL

John and Jorie Armstrong, acrobatic dancers, who were brought to this country from Europe as a feature attraction by the late Flo Ziegfeld, will appear in person at the Antioch Lions' club festival, Aug. 11-13.

Dances Show Honesty

Street-car conductors of Copenhagen, Denmark, declare that many Danes are often broke, but that few of them are dishonest. Often passengers declare they have no money, so the conductors issue slips for unpaid fares, thousands having been issued in the last year. Most of them are paid the following day.

Ancient Justice

Justice wasn't always represented, as she is today, by a statue of a woman blindfolded and holding a set of scales. Known to the Greeks as Themis, she was depicted by the ancient artists as a mature woman with large, open eyes.

Gulf of Mexico Gets Feed

During the severe winter of 1783-'84 people in Louisiana witnessed the rare sight of great chunks of ice floating down the Mississippi river from the north all the way to the Gulf of Mexico.

Wood in the White House

When the White House at Washington, D. C., was renovated and modernized in 1934, fully 8,000 lineal feet of Oregon's Ponderosa pine was utilized as window sills and door jambs.

Chinese Hairnets

The Chinese hairnet industry had its start in Shanghai.

Lingerie Boleros Prove Real Boon

Afford Lightning Changes in
One's Costume.

By **CHERIE NICHOLAS**

In this day and age of rush one scarcely has time between appointments to indulge in change of costume. To such the dainty lingerie boleros that are sold at the neck-wear counters are proving a real blessing. Career girls that are busy in studio and office during the day are finding these fantasies, created of eyelet embroidery or of lace or of eyelet pique, a perfect boon in that they achieve lightning changes in one's costume. Slip a spic and span bolero over the print silk frock or the thin black sheer dress, add a dashing boutonniere and immaculate gloves and presto! one is costumed to attend luncheon or tea in smartest restaurant or ready to go to the movie with one's best beau or drive out to the club garbed as attractively as anybody present.

Here's a formula for a smart town outfit that will class the wearer among smartest-dressed women. It's a bolero or jacket suit made either of black and white check silk or of lightweight wool—any material just so it is a striking black and white check. With this have several dainty lingerie blouses in readiness, that are prettified and utterly feminized with lace edgings and frilly details. With this wear white hat or black trimmed with white, white gloves and footwear. Navy and white, also brown and white checks are equally smart. Pin-check silk frocks with their matching jackets are ever so good style. Fashionable, too, is the redingote suit made of stunning checked surah silk.

Novel Buttons

Since button notes are style notes here's telling you a way to make simple clothes take on the look of distinction smart women covet. Remove the stereotyped buttons that fasten your new sports shirtwaist and sew on a set of shell buttons fashioned of sea shells as you will note below in the illustration, add a perfect summery touch to hot-weather costumes and they are bound to attract more than usual attention. Flowers for mademoiselle, and she curries to fashion's whim for florals with La Mode bouquet buttons. These are delicately cut of celluloid. They lend a "little girl" charm to the tailored blouse, especially when worn with a halo bonnet of straw as shown above in the picture.

Molyneux Offers Jacket Ensemble

Molyneux, who in a year dresses more top flight women than any dressmaker alive, does it on the "today's clothes for women today" plan, and has put over a smash hit style in his mess jacket ensemble. It comes in his new dark green called "marine," and has a wide set-in belt and sash of white taffeta ribbon. A rough straw sailor to be worn with it is a lighter green trimmed with white and dark green.

Paris Flashes

Revival of fur shoulder capes marks a new trend. Black lace shawls qualify as smart evening wraps.

Val lace edging trims youthful white linen evening jackets. Schiaparelli's flower toques meet with enthusiastic approval. Basques and bustles give quaint aspect to current fashions. Back-lace corsets that give nipped-in waistline are being shown.

High postillion crowns distinguish the advance millinery modes. Many black and white check costumes for about-town wear are to be seen.

Play Clothes Smartly Styled Of Dependable Wash Fabrics

By **CHERIE NICHOLAS**

PLAY clothes have come to be a theme of themes with costume designers. The idea of wearing just any old duds when you go out to play or to rough it in camp life or mountain climbs or just simple cross-country hikes is completely taboo these days. No woman of modern outlook can afford to sidetrack the issue of being smartly and appropriately garbed wherever she goes. There's absolutely no escaping the new demand for "style" tuned to environs of the time, the place and the game. Indulge in any outdoor pastime you will, but be sure you "look the part" in the matter of correct attire.

Designers have risen so valiantly to the occasion of creating an entire wardrobe of play clothes that all one has to do is to go to specialized departments and make your needs known and you will be outfitted to the "nth degree of correctness for this sports occasion or that."

However, there is more to the play clothes challenge than just style, for dependable wearability that will withstand the ravages of roughing it is of such vast importance one needs must meet the issue with all the art and science at command. Which is exactly what fabric manufacturers are doing.

Note the play clothes pictured. They are extremely fabric conscious

we can assure you, demonstrating perfectly the fact of their non-shrinkableness and their color fastness. Describing these timely modes, from left to right, the perfectly tailored slacks and shirt on the standing figure is of a wool and cotton flannel which has been scientifically sanforized shrunk in Switzerland.

A dark blouse with lighter skirt, both of sturdy cotton gabardine that has been pre-shrunk, as shown centered in the group will undoubtedly be a first choice with outdoor girls who know their 1939 fashions. Note the impeccably tailored pockets.

The Gay Nineties dressmaker bathing suit comes back again. Full skirt, basque bodice, snug-fitting waistband and tiny puffed sleeves with touches of narrow black velvet ribbon against demure yellow and white and black printed cotton describes the 1939 version of this quaint type as illustrated above to the right. Underneath this sanforized-shrunk cotton outfit jersey tights fit snugly making a complete trim and ship-shape ensemble.

Full of Nineteenth century charm, yet intensely modern with its brief bras is the booch ensemble on the sealed figure in the foreground. It can be relied on to give perfect wear in that the flower print cotton which fashions it is pre-shrunk and fast color. Quaint ruffles edge the snug shorts and finish the formal little semi-fitted basque-like coat. The platform shoes are also interesting. (Released by Western Newspaper Union.)

Hats, Tiny or Big

There is no excuse for not having a flattering hat this summer for every type is included in the showings from tiniest toques to brims that go to extremes in the matter of size. The diminutive hat for dinner and evening wear, as shown below, gains daily in popularity. It is here interpreted in soft iridescent feathers with a touch of shell pink velvet. The black veil is strikingly embroidered. Compared to some of the new brims the large mushroom hat shown here of black Milan is in reality quite conservative. There's no limit as to brim dimensions.

Favor Tweed-Like Linen for Suits

Although this year's linens abound in the traditional smooth finishes of the sort that denote well-bred aristocracy, many new versions are appearing. Something for the home make-your-own-clothes designer to get excited about is the smart new slubbed, nubbed and tweed-like linens which combine the celebrated coolness of flax with a fine aptitude for tailoring that insures a suit of distinction and comfort for town or travel wear.

Fruit Trims New White Straw Hats

Perfectly charming among summer-girl fashions are the new, usually large, rough white straw hats that are trimmed with clusters of gay colored fruit instead of the usual flower garnitures. This new fashion is wonderfully effective whether the hat be worn with an all-white costume or with a gay and festive silk print. It adds to the glory of this mode to carry a matching white straw handbag that is similarly fruit-trimmed.

Deck White Suits In Brass Buttons

There is no excuse to impart a military air to summer dresses and suits made of white sharkskin or white gossamer sheer wool by the use of handsome brass buttons, and in some instances epaulets of gold braid have been added. The fad for all white with gold trimming is also carried out in that gold kid belts are being worn with classic white dresses the draping of which takes on a sculptural beauty.

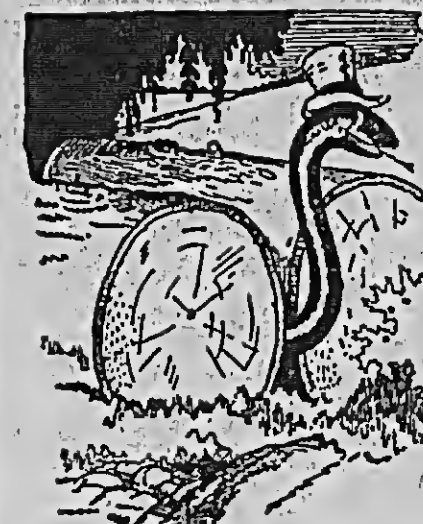

Fishnet Trim

A New York designer, on the search for something different to distinguish summer clothes, has turned to fishnet.

"Little Stories for Bedtime" by Thornton W. Burgess

MR. BLACKSNAKE CHANGES
HIS SUIT

NOW that Mr. Blacksnake had made up his mind to get a new suit he was in a hurry to get it. So he hurried about looking for a retired place in which to take off his old suit, but all the time he took the utmost pains not to be seen. Ordinarily, he does not care who sees him, but getting rid of an old suit for a new one is a very serious matter with Mr. Blacksnake. In the first place he feels very uncomfortable

You see, his old suit had caught between those two logs and he was peeling himself right out of it.

While he is getting the old suit off, and his temper, never of the best, is very, very short then. Also he has rather a helpless feeling. You see, he cannot slip his suit off easily in the way a boy can. He is like the little girl who has a dress with a great many hooks and eyes where she cannot get at them easily, and so must take considerable time, and sometimes lose both temper and patience.

At last he found just the place he was looking for. It was on the edge of the Green Forest, where the brush grew thick around a little pile of old logs. There was room to crawl under these. You know, Mr. Blacksnake does not require very much room, and here he found plenty for his purpose. He felt sure that no one would disturb him there, and that was a very important matter. Still more important was the fact that two of those logs were just far enough apart to make it a tight squeeze for him to wriggle between them. He smiled when he saw this. It was going to make it much easier to get that old suit off. You see, he

has no hands with which to pull it off as Old Mr. Toad pulls his suit off, and so he has to try some other way.

He glided all around under and between the logs to make sure that no one else was there, and then he glided this way and that way through the brush to make sure that no one was hiding there. At last he was satisfied that he would not be disturbed, and he hurried back to the pile of logs to begin the task of getting off his old suit. Now, you know Old Mother Nature has queer ways of giving her children new clothes. All this time Mr. Blacksnake really had his new suit on underneath the old suit. He had to get the old suit off, but he wouldn't have to put the new one on because it was already on. Old Mother Nature had attended to that.

He went straight to the two logs that were so close together, and then he began to push and wriggle and squirm as he tried to pass between them. He puffed and he blew, and I suspect that if he had been anybody but a snake he would have grunted. It was easy enough to get his neck through after he had got his head through, but the thickest part of his body was a terribly tight squeeze. Little by little he managed to get through. When enough of him was through to allow him to lift his head and look back he gave a little sigh of relief. You see, his old suit had caught between those two logs and he was pulling himself right out of it just the same way in which you pull your hand out of a glove.

When he saw this he went to work again and pulled harder than ever. He was afraid that that old suit might pull loose from the logs; but it didn't, and presently as he got the thickest part of his body through the old suit came off easier. A few more wriggles and pulls and he was out of it altogether. There it lay, turned wrong side out complete, clear to the tip of his slender tail. And the funny thing was that instead of being black it was white. Yes, sir, it was white, and so thin that you could almost look through it! But his new suit was black, oh, so black! And it was very handsome. Right away Mr. Blacksnake was in a hurry to show it off, and he didn't even give his old suit another look as he rushed away.

Now, what do you think—all the time he had supposed no one was about a certain thrifty little person of the Green Forest had been watching him!

Barrister Shows Flask; He Is Arrested in Court

LONDON, ONT.—When Remington White, Toronto barrister, defended a client in a London court, he was jailed himself.

James Elliott, the defendant, had been charged with possessing liquor illegally, and had summoned White to defend him. White appeared in court before Magistrate C. W. Hawkshaw and loudly berated the liquor control board as a means of defending his client. He was warned frequently by the magistrate about his forceful criticizing of the board.

Suddenly, during the course of proceedings, White drew a flask from his pocket and placed it before the magistrate.

"If this is contempt," he said, "arrest me. I carry this by doctor's orders."

When, upon inspection, the flask proved to contain whisky, White was placed under arrest.

Amateur Burglar Finds No Loot; He Complains

CINCINNATI.—A self-styled amateur burglar failed to find any loot when he broke into the home of William Keane, but he obligingly left a written criticism of the inadequate protection of the house against burglary.

The note: "Dear Madam: 'I am quite an amateur at picking locks and getting into homes. I will say your home provided no profit. But it was easy and provided no experience. Your dog is of no value. He only barked and that kept people from hearing me. This is only my second job. But I am smart and no coppers will get me. Respectfully, 'JACK CONNERS.'"

Marine Hymn Reversed;

That's Poetic License

Thousands of United States marines as well as civilians are familiar with the strains of the Marines' hymn, which proclaims the valor of the sea soldiers on many a far-flung battlefield.

The author of the original stanza reversed the chronology when he wrote "From the Halls of Montezuma to the Shores of Tripoli," for the marines were campaigning in Tripoli more than 40 years before they entered Mexico City with the triumphant forces of Major General Winfield Scott. Mere poetic license, however, can not dim the luster of heroic deeds which inspired the song.

Early in the last century, the marines were with Decatur, Preble and Bainbridge in our country's campaign to bring the Tripolitans to terms, often boarding enemy vessels and fighting hand-to-hand with pike and cutlass. Their crowning feat was the hoisting of Old Glory over the captured fortress at Derne, Tripoli, in April, 1805, the first time the Stars and Stripes floated over a fortress of the Old World.

It was a later generation of marines who played a valiant part in the assault and capture of the out-ward defenses of Mexico City in the Mexican campaign, and lost several men in killed and wounded, including one of their gallant leaders, Maj. Levi Twigg. With the army they marched into the city on September 14, 1847, and soon afterward the Stars and Stripes were waving over the historic site where the Montezumas, Cortez and succeeding rulers had held sway over the Mexicans.

For nearly a hundred years the hymn had been sung by the sea soldiers all over the world. "In the snow of far-off northern lands and in sunny tropic scenes" gaining more and more favor with the passing of time.

Honey Bee Was Imported To America 300 Years Ago

The honey bee is not native to the United States, but was introduced here 300 years ago. There was no word for honey bee in the American Indian language, and bees became known to the Indians as the white man's fly.

Authorities say that honey bees were introduced into New England in 1638, and that they probably were brought from Holland, writes a correspondent to the Chicago Tribune. These first bees were of the small type, commonly called black bees. They are common, but are not so popular among beekeepers as the larger kinds, such as Italian bees.

The fact that wild honey bees have been found in hollow trees and in caves in widely scattered areas of this country during the last 300 years has led to the popular belief that they are native. But those familiar with the history of the honey bee say that the first wild ones in America were swarms that left their hives in New England aparies and flew off into the woods. As civilization spread westward across the country the honey bee went with it, and often preceded the settlers.

Beekeepers refer to the different kinds of honey bees as races rather than breeds or varieties. There are many races and they are divided roughly into three groups, the Eastern, the European and the African.

Italy-In-Jugoslavia

Citizens of Ancona, on the east coast of Italy, face another bit of Italian soil just across the Adriatic on the west coast of Yugoslavia. Called Zara, this seaport, with its environs, was ceded to Italy by Yugoslavia in the treaty of Rapallo in 1920. Once the capital of Dalmatia, the Zara area comprises 42 square miles of territory and includes some 19,000 people. Its Italian population and historic association were arguments for its assignment to Italy. Protected by a group of small islands which almost surround the promontory on which it lies, Zara is strategically located as a potential base for naval operations. The technical geographic name for such a region is "enclave," which means an area enclosed by alien territory.

Rat-Proof Houses

Rat-proof houses are built in the island of Formosa, where these destructive rodents are a fearsome pest. To a stranger, a native hut at the first glance presents the appearance of being built upon four enormous mushrooms. In reality, the structure is lodged upon four posts, each of which is surmounted by an umbrella-shaped wooden shield. The rats can't get past that.

The houses of the better-to-do natives are sometimes supported on posts upon which the owner has placed inverted biscuit tins or old tin pails, but the wooden shields are by far the more prevalent throughout the island.

Sea of Galilee

The Sea of Galilee, a body of fresh water 13 miles long by seven miles wide, or approximately the size of Staten Island in New York bay, is 700 feet below the level of the sea. The Jordan carries its overflow in the Dead sea, a body of salt water, 1,300 feet below sea level, from which there is no overflow. The distance between the two seas is about 200 miles.

KNOW THYSELF

by John Harvey Furlay, Ph.D.

DOES YOUR VOICE INDICATE
WHAT YOU ARE LIKE?

FRANK LA FORGE, writing in Independent Woman, says: "When you speak, you broadcast to those within earshot a thumbnail history of your life. You indicate your state of mind, your state of health, and your breeding. It is surprising the amount of time the average young thing will spend on her appearance, dress, make-up and the like, and totally disregard the voice. She does not know what a perfectly good bet she is overlooking." Most of us can develop a pleasant voice by a little effort. Watch those who have soft voices, and try to make your own like them. Be natural and don't imitate. Make your own voice beautiful, just as you do your face, (or as a compensation for a none-too-beautiful face).

Trapshooting at Sun Valley
At Sun Valley, Idaho, there are skeet and trap-shooting grounds where complete equipment is available to guests who follow and enjoy this fascinating sport. For a reasonable charge, guns, birds, shells and boys to work the traps are available. Instruction may also be had in this sport from competent instructors versed in the use of shot-guns. For those who prefer rifle or pistol shooting there are ranges for this sport where guns and attendants may be obtained. Instruction is given, if desired, by experienced instructors.

Italian Travel Note
The candy butcher doesn't exist in the candy trains but dining cars get in of competition from platform apertures who sell delicious box or tea at every station around a time. For a quarter you get up sandwiches, fruit, pastry, and the inevitable bottle of Italian wine, all done up neatly in a white paper carton. Each station features food native to that locality in its lunches, and experienced travelers claim they can close their eyes, taste a sandwich, and tell exactly where they are.

ACES ARE BLANKED BY WADSWORTH TEAM

Sensational Pitching Aids St. Patrick's Team in Shut-out Victory

Sensational pitching by Shelly for St. Patrick's team of Wadsworth broke the winning streak of the Antioch Aces Sunday afternoon at Skokie field. Although marking up nine hits the locals were unable to bunt enough safeties to earn a single score and they were blanked 7 to 0—the first shutout game the Aces have had marked against them, for several years, according to Manager Luliver Lasco.

Shelly struck out 13 and allowed only one base on balls. Effinger was the hitting star for the Aces with 3 out of 4. St. Patrick's batters collected 12 hits and were aided in their scoring by seven errors by the Aces. Next Sunday the Aces will entertain their old rivals, the Silver Lake team on the home grounds. Each team will present the strongest lineup possible and the game ought to be a "dab."

Antioch Boosters Defeat Mansville

The Antioch Boosters once again pulled an "upset" Thursday night when they defeated the powerful Johns-Manville club, 4-1, "Lefty" Wolf worked on the slab for the Boosters and gained a total of 17 strikeouts. He proved to be invincible in the pinches.

Antioch scored first in the second inning on two hits, a walk and a passed ball. Johns-Manville tied up the game in the third on two hits. In the fifth inning, Antioch again forget ahead, on two hits. A single combined with a home run, in the seventh, ended the scoring for the game at 4 to 1.

This was the first defeat outside of league competition for the Johns-Manville players, who are considered one of Waukegan's top-ranking Class "A" softball teams. One of the biggest crowds of the season was on hand at the soft-ball field to enjoy the hard-fought contest.

The Boosters play on Monday, Thursday and Friday nights. The games start at 9 o'clock. A "donkey" softball game, set for August 4, is among the novelties on the schedule.

Call on Jim McMillen To Subdue "German Oak"

Local Celebrity Will Meet Hans Schnabel in Main Event Friday

Unbeatable Hans Schnabel, 225 pound German Oak who has been battering into submission every pro-wrestler set against him in Peg's Grayslake Arena this summer, has finally reached the top. He has been signed to go against Jimmy McMillen, Lake county's own nationally famous sporting celebrity, in the main event of an all-star big-time wrestling program at the local sport center Friday night.

Week after week the powerful German warrior who is built like a beer barrel with muscles, has been riding rough shod over everyone who

Jim McMillen

10 Commandments Of Safety For Hunters

In anticipation of the opening of the 1939 hunting season which begins on August 1 with the open season on squirrels, the Sporting Arms and Ammunition Manufacturers Institute has issued "ten commandments of safety" which are being distributed free with 1939 licenses. Village Clerk R. L. Murrie received the first of the 1939 licenses from the department of conservation yesterday.

With the slogan—"Safety First—Always"—the institute on its bulletin

CROQUET TOURNEY PLANNED FOR LAWN GAME DEVOTEES

James Webb, Antioch, is Announced as Chairman of Entries Comm.

Persons wishing to take part in the croquet tournament that will be held during the month of August on the lawns at the Fairway Grill and Pasadena Gardens, Highway 83, or Johnny Gevers' tavern, Trevor, may register with James Webb, Antioch, or at any one of the three croquet grounds, it was announced today.

About a dozen persons have signified their interest in the holding of a tournament, to date, and it is expected that other croqueters will be coming to the fore within the next week or so.

To Have Prizes
Prizes will be awarded to the winning players, according to the tournament committee.

Men, women and juniors are eligible to compete. Joe Fox will have charge of registrations at the Pasadena Gardens grounds, Dick Moran at the Fairway, and Johnny Gevers at his place.

gives the following ten commandments for sportsmen:

1. Treat every gun with the respect due a loaded gun. This is the cardinal rule of gun safety.
2. Carry only empty guns, taken down or with the action open, into your automobile, camp, and home.
3. Always be sure that the barrel and action are clear of obstructions.
4. Always carry your gun so that you can control the direction of the muzzle even if you stumble.
5. Be sure of your target before you pull the trigger.
6. Never point a gun at anything you do not want to shoot.
7. Never leave your gun unattended unless you unload it first.
8. Never climb a tree or a fence with a loaded gun.
9. Never shoot at a flat, hard surface or the surface of water.
10. Do not mix gunpowder and alcohol.

COME OUT OF THE KITCHEN

Summer is calling! Warm, sunny days beckon

you! Make the most of them. Plan meals that lighten the burden of cooking... that let you enjoy more hours out-of-doors. Your neighborhood A & P Store is ready to help you. You will find A & P prepared to fill your requirements with a wide assortment of cooling foods for sweltering days.

TAXPAYERS SHOULD CHECK VALUATIONS

This is Quadrennial Assessment year, and the valuations fixed this year by the assessor will be the basis of taxes for the next four years. Any property owner who objects to the amount of his valuation should file a formal complaint with the board of Review immediately.

FARM
TOPICSWINDMILL POWER
IS CHEAPEST WAYElectric Pump Found Most
Convenient.

By A. G. TYLER

The wind that whistles around our ears in January and that gently waves the fields of grain in July is still found to be one of the cheapest sources of power for same farm jobs, according to the division of agricultural engineering at the University of Minnesota. After summarizing the history and development of windmills all over the world, the following conclusions are reached as far as power for pumping water is concerned.

If low first cost is of prime importance, then pump by hand.

If convenience is the feature most desired, the electric pump is best. If moderate first cost, no operating cost, freedom from monthly bills, and general all-around reliability are desirable, then the windmill will be the choice.

Tyler pointed out that the power output from farm windmills depends upon the diameter of the wheel. To compare the power developed by wheels of different sizes, multiply by itself the diameter of each wheel.

For example, an eight-foot mill will do almost twice as much work as a six-foot because six times six equals 36 while the diameter of an eight-foot wheel multiplied by itself gives 64. Likewise a 10-foot mill will do about three times as much as a six-foot mill. Large wheels run in lighter winds.

Fur-Bearing Animals

Disappearing Rapidly

With but few exceptions, fur-bearing animals represent a disappearing race. The death knell of several species was sounded long ago; others are being crowded into oblivion despite the efforts of state legislatures, through ever-shorter fur-taking seasons, to stop the decline.

Fur animals cannot increase, or even maintain their present numbers, without enough wild land to roam. Drainage projects have destroyed millions of acres suitable for wildfowl and furbearers. Over-trapping, too, for the billion-dollar fur industry, has had an influence.

These are statements of Dr. W. J. Hamilton Jr., zoologist at the New York state college of agriculture.

"We can never hope to restore our fur animals to the level of pioneer days, but we can help to restore, in numbers, many fine species. One way would be to restrict the trapping season to periods when fur is prime. Furs would then be taken when at their greatest value, and unprime pelts, that glut the market each year, would be reduced."

Insects May Be Cause

of Stored Grain Loss

With AAA loans on corn and wheat increasing the farm storage of grains, farmers are cautioned to guard their grain from insect damage.

"If no preventive or control measures are taken, grain held for any length of time in farm bins is almost sure to become infested with insects with consequent loss in value of the grain for seed, for feeding or for market." It is explained in a circular issued by the college of agriculture, University of Illinois.

Best measures recommended for controlling stored-grain insects and preventing damage are cleanliness and fumigation. Preventive measures must be taken before the grain is in the bin, since most insect damage is caused by failure to clean bins before the grain is stored. It is best to remove waste grain from cracks, corners and bins of bins.

Once grain is in the bin and has become infested with insects, fumigation is the only practical method of stopping damage.

Shorts and Middlings

A kilowatt-hour is the equivalent of 1,000 watts used for one hour.

A deep yellow egg yolk usually contains more vitamin A than does a pale egg yolk.

As a rule, all permanent poultry buildings should face toward the south and be on land that slopes gently the same way.

The U. S. bureau of plant industry warns that many of our wild flowers will be extinct in 25 or 50 years unless measures are taken to conserve and increase them.

Separating the cockerels from the pullets gives the latter a better chance at the feed hoppers. Cockerels usually grow faster and get more than their share at the feeders.

Cows milked twice a day produce only about five-sixths as much during a ten-month lactation period as they do when milked three times a day during the period or four times a day for the first five or six months and three times a day thereafter.

Madison First President

To Always Use Long Pants

James Madison was the first President of the United States who habitually dressed in long trousers while he was Chief Executive. Washington, the elder Adams and Jefferson wore knee breeches during their administrations, says the Rocky Mountain Herald.

Trousers, or long pants, were adopted in France in 1789 by the supporters of the revolution. For that reason the revolutionists were known as "sans culottes," which literally means "without breeches"; that is, "without knee breeches worn by the royalists."

Many Americans adopted long pants in token of their sympathy with the French revolution. Between 1700 and 1800 trousers gradually came into vogue among the common people in America, but it was not until 10 or 12 years later that they were substituted for breeches on dress occasions. Although the duke of Wellington is said to have worn trousers in England after the Peninsular campaign, Beau Brummell is usually credited with having popularized trousers in that country.

Frosts Solve Surplus

In man-made frosts the Louisiana strawberry farmer may find a solution to his surplus crop. The fragrant berry, according to members of the Growers' and Shippers co-operative union, is highly perishable and while a frost will kill it in the field, the same and greater amounts of cold can preserve the picked berry for shipment out of season. The strawberry belt is already equipped with a cold packing plant to which the berries are brought, sorted and packed into cartons. They are then frozen at 40 degrees below zero in huge coolers which resemble bakers' ovens somewhat. Afterward they are stored in cold rooms to be shipped when needed. The idea of freezing berries, if gradually extended, could enable a farmer to preserve his entire surplus crop which at present is frequently lost.

Mole Isn't Criminal

The ground mole, so often accused by the gardener of eating valuable bulbs and underground parts of plants, is not so much the criminal, as an "accessory before the fact," reports the federal bureau of biological survey. With the exception of the Townsend mole found along the Pacific coast, these burrowing animals live largely on underground insects, grubs, and larvae. The myriad tunnels dug by the mole, however, often become runways for the small, short-tailed pine mice, or, in some instances, the field, or meadow, mice. These rodents are the real offenders. They are vegetarians and eat roots and bulbs of garden plants.

In Memoriam: One Rabbit

Long before the days of the WPA, back in rural Piedmont, N. C., of Guilford county, legend has it that a construction-minded rabbit that gave the name to a backwoods crossroad. It seems that the rabbit became so interested in the progress of the road building, that he would come out to watch the men at work day after day. The fate of the rabbit is unknown but his memory is revered by the name of the community—Rabbit Crossroads.

Lake Often 'Vanishes'

"Now you see it and now you don't" might well be said of Ireland's strange Lake of the Eye, which has a way of vanishing overnight. Although it covers about 40 acres, it completely vanished in 1933, as it also did once in the early 1800s. It is situated in Greagh, County Sligo, and according to local legend, is under a curse. The curse causes it to vanish from the earth once in every 100 years.

Profitable Meters

Houston, Texas, claiming more parking meters than any other city, collected 4,185,478 nickels from its machines in 1938, a fund of \$209,273.90.

Rage for Ribbons Is Style Feature

New Fad Is Expressed in
Endless Ways.

By **CHERIE NICHOLAS**

The milliners, of course, have long considered ribbons as an essential to their lovely trade, but it is not often that dressmakers show themselves as interested in ribbons as they are this season. There is a veritable renaissance of the ribbon in Paris, and it things go on at this rate, ribbons may find themselves as important as they were in the modes of Louis XIV's time.

Ribbons in use are of all widths from the tiny "baby" type to 12 or 16-inch sashes. Ribbon sashes are around the waists of many a summer frock. Quantities of the ribbons favored are of velvet, with others in grosgrain, satin or taffeta.

The featuring of ribbons this season is expressed in endless ways, but there are two outstanding uses made of them which should be especially mentioned. The one is the craze for ribbon streamers on hats. These streamers add a note of infinite charm and variety for some of the streamers are short, the majority are long, some like 'em wide, others like 'em narrow, and thus the ribbon streamer vogue carries on in the millinery realm.

The other significant use of ribbons is the revival of that pretty custom of running narrow ribbons through endless yards of lace or embroidery beading as trimming for petticoats, camisoles and the most intriguing appearance of ribbon-drawn beading is on ingenue evening dresses of dimity or organdy or fine batiste. No prettier party dress fashions for debutantes and sub-dobs can be conceived of than these quaint types that glorify exquisite cotton weaves so daintily styled with wee ribbons.

Practical Suit

No matter how many fluffy-ruffle, sweetly feminine tags you take with you on your summer vacation you will find that the suit that gives the most comfort and satisfaction is the one that is absolutely practical and ready to meet any emergency that may arise. Just such a ready-for-any-occasion suit is here pictured. This youthful gray flannel jacket suit tunes to either town or country wear and it would be grand to take along on a cruise—perfect also to wear to the New York or to the San Francisco fair, especially later in the fall. With sheer blouses it will provide ideal attire summer through. The hood makes a graceful collar when worn down and an appreciated protection when rains do fall and winds do blow. The wide patch pockets on the flaring skirt are new and a blue and white polka dot blouse comes with the suit.

Mirrors for Belts

A new way to link up an evening coat with a dress is by way of mirrors.

Style Notes

White porcelain jewelry is important.

Hats all of lace or eyelet embroidery are high-style.

White with bright red is smart color note for summer.

White rayon jersey costume suits enter the summer scene.

Evening gowns of white pique beautifully tailored are favorites.

Wide and handsome ribbon trims the majority of midsummer hats.

To wear with summer print frocks choose a white sharkskin top.

There's widespread call for redingote ensembles made of twin prints.

Of same print silk as the dress or jacket costume worn.

Look Pretty as a Picture in Frocks of Dainty Silk Sheer

By **CHERIE NICHOLAS**

SO LITTLE MISSY and Miss Sweet Sixteen are dated up for just one party after another this summer? Hearts set all a flutter as to delectable gowns that will make young moderns look pretty as a picture? Which leads up to the why and wherefore of the accompanying illustration. This group of adorable party frocks conveys an all-important style message in regard to summertime party frocks, namely that of the supremacy of fine silken sheer fabrics in the mode.

The weaves in the category of silk sheers that are favored most include silk organics in white or pastels, marisettes, mousseline de soies, also either soft or starched silk chiffons, frothy white silk tulles, silk nets and of course the loveliness of silk laces is not ignored. Not a sheer in the above mentioned list but that works like magic in accenting the endearing young charms of party-going young daughters this season.

The outstanding characteristic of the new sheer frocks is a quaintness that reminisces of Civil war fashions. To give the ultra-feminine look and the coy simplicity that present styling implies, designers are indulging freely in such fetching details as flounces, dainty ruffles, bow-knot or flower appliques, and the newest gesture is the revival of gay ribbons (supposed to change the color of your ribbons to tune to your mood) run through yards and yards of beading, just like in the old-fashioned days.

The majority of party frocks look very bouffant with their wide skirts, and the most ultra models have nipped-in waists like heirloom daguerotypes portray, for the

trend at present is more and more to wasp waist silhouettes. The flounce that flourished in Civil war times have returned.

Sometimes just one knee-deep flounce gives added fullness about the hemline. Then again flounces are tiered one above another. The old-fashioned way of heading the flounce with lace or embroidery beading, through which colorful beading has been run, adds to the quaintness of present day styling.

In the lovely girlish frock to the left the bow-knot applique done in ribbon enhances the full skirt. The little girl in the background has her silk organica dress similarly fashioned, thus carrying out the popular idea of sister fashions. Frocks of this type are equally lovely fashioned of either white or pastel chiffons or silk organics.

The little girls in the foreground are charmingly gowned. The diminutive lace jacket worn, as shown centered in the picture, is enough to delight any little girl's heart.

Very prettily styled is the other little girl's dress. It is made all of lace with flutings of self lace adorning the bodice top and outlining the waistline.

A styling trend very noticeable in the smartest new gowns is that of the all-over shirred waist. The new sheers yield to this treatment very pleasingly. The shirring can be easily done by the home dressmaker by loosening the tension of one's sewing machine and lengthening the stitch. Then when the machine stitching is done pull the top thread and even shirring will result. Thin paper placed under chiffon while stitching keeps material flat. It tears away easily.

(Released by Western Newspaper Union.)

Lumber-Jacket Top

The lumber-jacket influence continues throughout summer fashions. So much so many of the daintiest sheer lingerie blouses are now made with belts (some worked with lace insertion and edging) that fasten over the skirt. Printed silk sheers such as pictured proclaim the new fad in this youthful lumber-jacket silhouette that has come in on the crest of the widely heralded "little girl" vogue. Note how its belt buttons over the skirt. The remarkable thing about the silk that fashions this dress is that it is the new sanitized type, treated with process that acts as a deodorant.

Flare for Rubber Flowers Growing

The idea of wearing the new rubber flowers as a corsage or boutonniere elsewhere than on the beach is gaining. These lovely flowers are too attractive to confine within a limited realm. Then, too, they are eminently practical, for soap and water will keep them fresh-looking indefinitely.

Natural colors, grace of design and true reproduction of nature marks these corsages as outstanding. Anemones in pastel colors envelop a swim suit with true artistry. Deep pink carnations are lovely to wear in an evening culture. Roses of realistically colored rubber and dahlias in colors true on sport jackets are ever so effective and outstanding.

Stripes Back in Fashion Picture

The cycle of fashions continues to revolve and now the indicator stops at 1915, the era of the Castle walk and, from the sartorial standpoint, of stripes.

But striped materials in the hands of the modern designer have a spicy verve wholly different from those recorded in the fashion books of almost a quarter of a century ago. One of their paramount virtues is that they are slimming. However, their chief charm is that they lend themselves to such varied and exciting adaptations.

Flowers and Snoods

A charming evening headress, if you wear your hair long enough to use a snood, is the combination of snood and flowers.

20 Different Elements Used in Making Steel

About 20 different elements, ranging alphabetically from aluminum to zirconium, are used today in various combinations and proportions in the manufacture of both plain carbon and alloy steels.

Some are used because of the specific properties which they impart to steel when they alloy with it, that is, dissolve in the iron, or when they combine with carbon, wholly or in part, to form compounds called carbides, says Steel Facts. Others are used because of their beneficial effects in ridding the steel impurities or in rendering impurities harmless. A third group is used to counteract harmful oxides or gases in the steel. The elements of this latter group are merely fluxes or scavengers and do not remain in the steel to any great extent after the steel solidifies. Some elements fall into more than one of the aforementioned groups.

Most of the elements are introduced into steel in the form of ferro-alloys, alloys of iron and some other element or elements (carbon excepted) made especially for use as raw material in the manufacture of steel. Ferro-alloys are used because many of the pure metals are costly to obtain, there is no necessity for iron-free metals when they are to be added to steel, and some elements, such as manganese and titanium, are difficult to extract from their ores without the presence of some helpful agent such as iron. The part played by iron in the ferro-alloy, therefore, is primarily that of a vehicle for carrying the desired elements.

One Inch of Rainfall Is a Lot of Water

Rainfall is measured in inches, as we know. But exactly what does an inch of rain represent? Doesn't sound like much, does it?

Here are some comparative figures: One gallon of water weighs 10 pounds and would cover about two square feet of surface with a layer one inch thick. To cover a square mile of the earth's surface with a layer of rain one inch thick needs 120,000,000 pounds of water, or 12,000,000 gallons—which is a lot of water.

A good thunderstorm which pelts water down on the earth all night long will result in perhaps a half-inch of rain. If the storm covers a hundred thousand square miles before it wears itself out it will therefore deliver to the earth 600,000,000 gallons of water.

Least this seem a considerable amount let us think of the Khasia hills in India, which is reputed to receive the heaviest rainfall in the world. The average is over 600 inches of rain per year, or 7,000,000 gallons of water per square mile.

Venice Gets Art Exhibits

Important contributions to the exhibition of the works of Paolo Veronese at Venice are being sent from foreign galleries and museums. W. R. Valentier, head of the Detroit Art Institute, and one of the greatest authorities on Italian medieval sculpture, is in charge of the commission dispatching a number of works by Veronese from America. The Boston Fine Arts museum contributes four works entitled "Diana Surprised by Actaeon," "Atlanta and Meleager," "Olympia," and "The Loves of Venus and Jupiter." From the Cleveland Fine Arts museum comes the half-length portrait of Agostino Barbarigo. San Francisco is sending a magnificent family portrait which was formerly in the collection of Prince Leuchtenberg at Munich, while the Cambridge, Mass., museum will loan a page of sketches for a composition of the "Baptism of Christ." These sketches are believed to represent one of Veronese's last works.

Cane From Malay

Cane used for the construction of porch furniture grows in the form of a vine in Malayan jungles. It is employed by the natives for the building of huts and bridges and when baked by the tropical sun, it becomes extremely durable. Gathered by the natives, this cane is shipped to Singapore from which port it is sent to our large furniture manufacturing concerns. Although it is often preferred in natural finish, cane furniture, decorated in attractive colors, is sometimes featured in the furniture markets.

Atmosphere

At or near sea level, the atmosphere is about 21 per cent oxygen. While this percentage remains constant up to an elevation of about seven miles, the actual amount of oxygen decreases at high elevations because here the air is not as compressed as at sea level. At very high elevations, above 45 or 50 miles, the lighter gases, e. g., hydrogen, predominate.

Eight Inches a Mile

The curvature of the earth is estimated to be eight inches per mile, that is, from a given point it curves eight inches for the first mile, 32 for the second, 72 inches for the third, and so on. The law is: Curvature is always equal to eight inches multiplied by the square of the number of miles from the point of contact with the earth's surface of a tangent line.

FARM TOPICS

SLEEPING SICKNESS PRECAUTION URGED

Two Doses Immunize Horses For 8 Months.

Horses treated with two doses of chick embryo vaccine to prevent sleeping sickness are immune to the disease for a period of at least eight months, it is indicated by immunity tests being conducted by the division of animal pathology and hygiene, college of agriculture, University of Illinois.

Further tests on immunity will be conducted at the agricultural college to keep veterinarians and live stock owners informed with reference to the period of immunity established by the vaccine.

In the meantime, it is suggested that all good horses be immunized immediately with two doses of chick embryo vaccine to avoid losses which were reported in 85 different counties last year.

Horses that had the disease and recovered last year and horses that were vaccinated should be revaccinated, it is recommended by staff members of the division of animal pathology and hygiene.

It is hoped that tests under way at the college of agriculture will determine if horses are immune longer than eight months.

Suspicious clinical cases of sleeping sickness in horses have been reported from different sections of the state. However, tests of materials submitted to the laboratory of animal pathology and hygiene have as yet failed to yield the virus of the disease.

Mulching Commendable For Soil Conservation

In order to preserve its strength, soil must be protected with some kind of covering to prevent rains from washing away the finer particles.

In the opinion of Russell E. Underwood, extension soil conservationist at the New Jersey college of agriculture, Rutgers university, the use of mulch is valuable in this respect, especially where specialized crops prohibit the use of soil-conserving rotations.

"When specialized crops are grown on sloping land and clean cultivation is practiced to control weeds and check evaporation of soil moisture, the soil is exposed and very vulnerable to dashing rains," Mr. Underwood explains.

"Mulch should be applied in strips across the slope so as to cover from one-half to two-thirds of the land area. This applies to mulch grown on available adjacent land. Frequently, however, the mulch crop could be grown and not harvested but allowed to remain on the land for protection against erosion. Oats, barley and sudan grass planted in late summer will make fairly good growth before being killed by winter freezes. Such material offers good protection against winter erosion and has the advantage of being anchored to the soil so that it is not washed or blown away."

Nature Toes the Mark In Control Laboratory

Night or day, sunlight or darkness, temperature control within a fraction of a degree, and plant-life that can be "put to work or put to bed at will," all are under the control of scientists in a specially designed chamber at the New York state college of agriculture.

The exactness of control is probably the greatest yet achieved in any laboratory, and the aim is to unravel the mystery of plant "vigor," the quality that makes any one stock superior to others, either in yield, disease-resistance, or in other ways.

In plant breeding, it is known that when two inbred or purebred strains are crossed, the result (a hybrid) may be astonishingly better than the parent stock. This is referred to as "hybrid vigor." Why and how this happens are subjects of study by plant physiologists.

Farm Topics

One of the best ways to cut the cost of growing heifers is to provide improved pastures.

Records kept by dairy herd improvement associations increase the sales value of good grade and purebred animals.

Horses of good draft type, fine quality and energetic, kindly dispositions do the most work, endure heat well, and sell for highest prices.

Shifts in high analysis fertilizers are creating a need for more exact labeling, including the content of the secondary elements in the mixtures, say U. S. department of agriculture chemists.

The practice of fertilizing land with phosphorus bearing material is older than written records. The first acid phosphate fertilizer was made in 1842 by John Lawes, an Englishman who treated bones with sulfuric acid to make the phosphorus more readily available to plants.

ITALIAN PRIEST'S HUGE LEGACY SETS MANY HEIRS AGOG

Catholic Church Contests
Claim of Pastor's Kin
To \$10,000,000.

ROME.—A local law court will decide soon whether \$10,000,000 deposited 25 years ago in an American bank by a priest now dead belongs to the Vatican or to the one of 3 heirs who are claiming the fortune.

The verdict will end years of gallop to determine who is the rightful successor to the money bar in the United States a quarter century ago by a certain Father Pirro Pascucci.

Father Pascucci died at Racine, Wis., in 1914, a frugal priest of modest income. Surprisingly, he bequeathed a legacy of \$200,000 payable by an American bank to his nephew, Luigi Pascucci.

Mystery Deepens. The mystery of Father Pascucci's legacy was deepened some years later when the American consul at Naples gave notice that an American bank was looking for a priest by the name of Pirro Pascucci to ask him what was to be done with the remainder of a \$9,800,000 fortune.

The news attracted the attention of almost every family in Italy with the name of Pascucci, who, since the original nephew, Luigi, had died, have established separate claims to the money. It also attracted the attention of the Catholic church.

In 1914, according to church records, when the specter of the impending World war cast a darkening shadow over the future of Italy, a priest by the name of Pirro was given \$10,000,000 to deposit abroad.

Vatican Contests. As Father Pascucci died a few months after being entrusted with the money, the church points out that he probably lacked sufficient time to make proper arrangements for the succession of the money to the church. The Vatican has, therefore, put in its claim for the sum.

As the case now stands it is not certain how the Rome tribunal will decide as to ownership. The Pascucci heirs, each of whom claims that the money belonged to Father Pascucci but that the money wasn't willed them directly because "Uncle Pascucci" wanted to avoid inheritance taxes, are numerous.

Although the claim of the Catholic church seems best substantiated by the known facts, the account in the American banking institution is legally payable only to the heirs of Pascucci as it was deposited in his name.

Wild Baboon Crashes an African Garden Party

BULAWAYO, NORTHERN RHODESIA.—A large wild baboon crashed a garden party held by the wife of the provincial commissioner of Ndola, Mrs. H. F. Cartmel-Robinson.

There was a large assembly of guests on the lawn enjoying tea when the baboon arrived. The guests fled into the house, while the baboon finished the pastries left by them, picked some flowers, and having tried to enter the house, disappeared.

The same evening, when Mrs. Cartmel-Robinson heard the doorbell ring, she went to admit what she thought were guests for dinner. But when she opened the door, the baboon was there. She shut the door hurriedly, but the baboon kept on ringing the bell.

Eventually one of the guests shot the baboon as it tried to beat its way through a wired-in veranda.

He Did His Bit for Love And Is a Two-Way Loser

KEOKUK, IOWA.—Frank Thompson, 32 years old, contemplated with some bitterness today the fickleness of a woman for whose love he voluntarily went to prison.

Thompson accented a Keokuk policeman one night in November, 1937, and confessed: "I'm wanted for a mail robbery at Georgetown, Ind., and I'm a former federal prisoner. Please send me back." He served his term in the Lewisburg (Pa.) penitentiary and the Springfield (Mo.) prison hospital. Last night he accented another Keokuk policeman.

"I'm the guy who surrendered here for a mail robbery 16 months ago," he said. "I gave up and got right with the law because I fell in love with a girl at Indianapolis. She was going to wait for me. I just got out of jail and went to Indianapolis. She's waiting all right—married to another man."

Vain Kitten Falls Into Vat; Rescued by Police

BOSTON.—Mickie, a vain little kitty, decided she needed an all-shampoo.

So Mickie made herself pretty in a tank of fuel oil gas.

The above ditty is the tale of a kitten named Mickie, which fell unnoticed into a 1,000-gallon tank of crude fuel oil.

The reckless kitten paddled around for hours, before she was rescued by police, led to the tank by Henry Nickerson, 12, the tearful owner of the pet.

The officers fashioned a noose from a length of rope and lassoed Mickie by the neck, pulling her to safety.
